(26-0) Case Number: CPC-2022-6472-DB-CU-SPP-HCA and ENV-2022-6473-SE
5353 North Del Moreno Drive, Woodland Hills CA 91364

Discussion and possible action

10 Minutes

Subject: 5353 North Del Moreno Drive, Los Angeles, CA 91364 **Case Number:** CPC-2022-6472-DB-CU-SPP-HCA **Environmental Case Number:** ENV-2022-6473-SE

MOTION:

The PLUM Committee recommends that the Board of the Woodland Hills–Warner Center Neighborhood Council OPPOSE the proposed project at 5353 North Del Moreno Drive and the related environmental determination, and that it transmits that opposition to the Department of City Planning, the City Planning Commission, and Council District 3.

FINDINGS:

WHEREAS, the project proposes a 41,567-square-foot mixed-use building with approximately 40,559 square feet of residential use, 1,008 square feet of commercial use, and 71 guest rooms, only eight of which are designated for low-income households, along with the applicant requests for multiple detrimental incentives, off-menu incentives, and waivers of development standards requested under the Density Bonus Law;

WHEREAS, the project site is located within a single-family neighborhood and on the site of an existing single-family home, adjacent to a preschool and across from a high school, therefore creating an intensified pedestrian environment during arrival and dismissal periods involving young children, students, and accompanying adults;

WHEREAS, the project is located and will negatively affect the quality of life and the real estate values of the adjoining properties.

WHEREAS, the project will not follow the zoning requirements of the property and the neighboring properties in height, front and back yard setbacks, floor area ratio, transitional height and landscaping.

WHEREAS, the project does not meet the intent of the Ventura-Cahuenga Boulevard Corridor Specific Plan

WHEREAS, the application requests waivers or reductions from nearly all applicable development standards, including but not limited to:

- A floor area ratio of 2.75:1, in lieu of the 1.0:1 permitted under §6.B.3 of the Ventura-Cahuenga Boulevard Corridor Specific Plan;
- A height of 46 feet, in lieu of the 30 feet permitted under Specific Plan §7.E.1.f;
- 87% lot coverage in lieu of the 60% maximum permitted under Specific Plan §7.B.2;
- Zero front-yard setback in lieu of the 18-inch setback required under Specific Plan §7.A.3.a.ii;
- Four-foot side-yard setbacks in lieu of the seven-foot setback required under LAMC §12.13.5.b.2;
- A four-foot rear-yard setback in lieu of the 16-foot setback required under LAMC §12.13.5.b.2;
- Elimination of transitional height under LAMC §12.21.1.A.10;
- Zero residential parking in lieu of 78 spaces under LAMC §12.21.A.4.
- Zero commercial parking in lieu of 8 spaces under Specific Plan §7.F.1.c and LAMC §12.21.A.4.
- Zero short- and long-term bicycle parking under LAMC §12.21.1.A.16.
- Waiver of Low Impact Development requirements under LAMC §64.70;
- Zero on-site landscape area and zero on-site trees; and
- Zero street dedication in lieu of the one-foot dedication otherwise required under LAMC §12.37;

WHEREAS, Government Code §65915(e) authorizes waivers or reductions of development standards only when applying the standard would physically preclude construction of the project at the permitted density bonus; and the record before the Committee does not adequately demonstrate that eliminating or substantially reducing this many standards in combination — particularly setbacks, transitional height, landscaping, parking, and lot coverage — is necessary to achieve the permitted density bonus project;

WHEREAS, Government Code §65915(d) limits the number of incentives or concessions available to a project based on its affordability percentage, and the requested off-menu incentives must be evaluated against that statutory cap rather than treated as freely available;

WHEREAS, the Ventura-Cahuenga Boulevard Corridor Specific Plan was adopted, to regulate scale, transitions, and neighborhood compatibility along the corridor, and the proposed combination of nearly tripling the FAR, increasing height and lot coverage, eliminating transitional height, and reducing setbacks substantially undermines those stated planning objectives;

WHEREAS, the transitional height under LAMC §12.21.1.A.10 is intended to reduce density at the interface with lower-scale residential zones, and waiving that standard in its entirety permits the full proposed mass to rise to the property line abutting adjacent residential neighbors;

WHEREAS, although state density bonus provisions may constrain the City's authority to require parking in certain circumstances, the record does not adequately assess the operational parking demand associated with an eldercare-oriented residential use, including continuous staffing across multiple shifts, family and caregiver visitation, non-emergency medical transportation, pharmacy and meal delivery, and service vehicles, particularly given the project's proximity to schools and the constrained surrounding street network;

WHEREAS, the combination of zero front setback, zero on-site parking, and the project's school-adjacent context creates foreseeable concerns about curbside drop-off conflicts, sidewalk circulation, and pedestrian safety during peak school hours, which the application materials do not adequately address;

WHEREAS, the proposed elimination of on-site landscaping and Low Impact Development requirements, combined with 87% lot coverage, would substantially reduce on-site stormwater management capacity and the buffering features intended to mitigate urban impacts and maintain compatibility with adjacent uses;

WHEREAS, the Committee finds that the current administrative record lacks sufficient project-specific analysis demonstrating that the requested waivers and incentives remain compatible with adjacent sensitive uses, pedestrian circulation, and the adopted purposes of the Ventura-Cahuenga Boulevard Corridor Specific Plan;

WHEREAS, the project's adjacency to a preschool and proximity to a high school, together with the cumulative scope of the requested waivers from setback, landscaping, parking, transitional-height, and stormwater standards, constitute site-specific circumstances that warrant further environmental analysis and careful consideration of whether reliance on a statutory or categorical exemption from the California Environmental Quality Act is appropriate;

THEREFORE, BE IT RESOLVED:

THAT the Planning and Land Use Management Committee recommends that the Board of the Woodland Hills–Warner Center Neighborhood Council **STRONGLY OPPOSE** Case No. CPC-2022-6472-DB-CU-SPP-HCA and Environmental Case No. ENV-2022-6473-SE; and that the Board transmit this opposition and the foregoing findings to the Department of City Planning, the City Planning Commission, and Council District 3.
