WHEREAS, the project is currently being reviewed and assessed by the Mulholland Design Review Board which has made specific requests for design changes to the project, and will review those changes at a future date; and

WHEREAS, the architectural design, materials and MDRB requested changes are acceptable to the WHWCNC PLUM Committee; and

- 4) Applicant to remove all existing “scrub” trees and bushes on the property that intrude over the Alhama right-of-way and impact traffic.
- 5) All balconies on the structure to have drainage systems installed that will conduct rainwater into City approved water retention systems and not channel water onto the slope

- 6) The irrigation system to have some form of “catch system” so that water does not pool at the toe of the hill and can be safely conducted to the roadway once solid material shave been filtered out.
- 7) Excessive height concerns should be determined by the MDRB and mitigated if necessary.
- 8) Hillside slope should have plantings of shrubs with large and deep root systems than those shown on the initial submitted landscape plan in order to hold any potentially eroding soil.
- 9) All plans presented at the August 17, 2017 WHWCNC PLUM meeting shall be dated as such and resubmitted to Planning as an (updated) project application submittal.
